HASH TRASH

It is a truth universally acknowledged that the hash trash never lies. What you are about to read either has happened, is happening now, or will happen at some time in the future. Or nearly, anyway.

Vampire took a leaf out of **Boxy's** book and decided that project management was the best way to go for **Run No. 2149** (this has been highlighted for those suffering from a weekly memory deficit in relation to run numbers).

Heartstarter was subcontracted to do the run, and **Ryvita** subcontracted to do the walk, but nobody cared who set them as long as **Vampire** was still able to prepare her usual outstanding signature meal of nachos.

Run No. 2149 was also important because it was **Abbo's** 1300th run. He feels this is quite an achievement for a 40 year old. Clearly his hashing days began as a foetus. **Ten Fingers** impressed the group with his double twist with a half pike and landing back on his feet after tripping over the rope attaching the bottle opener to the esky. An in depth Workplace Health and Safety Risk Assessment was completed and identified that the risk of not having a bottle opener far outweighed the risk of any permanent physical disability or injury that might be incurred by hashers, so the rope stays.

Boxy reported on the run which he felt was generous with markings, checks and regroupes, so gave it 8.2 out of 10. **Sherbet** gave the walk report and felt that it was reasonably well marked, but since she had the outsourced hare walking (**Ryvita**) with her giving instructions, she didn't really care, and gave it 9 out of 10.

Despite no word from **Scrubber** for the last 6 months, he sent a message to **Smooth Ride** during the walk to confirm that he will be setting the run next week, with an added affectionate note. "PS: Yes, it's f*cking sausages!"

Smooth Ride might need to be charged next week with photo-bombing (see accompanying photos).
